

Frost Protection Plan for Spring Season

Jeffery's

Check list: Protecting Annuals

- **Apron Sets:** Secure Blue Tarps around perimeter of Shade Tents
- **Benching inside:** Need to be covered completely – all sides– no air coming in – use plastic or black landscape fabric
- **Baskets:** Remove from inside runs & racked up to rolled inside store
- **Standing Carts:** Carts full of product should be rolled inside store

- **The GOAL of “tarping the Apron” and “Covering the Benches” is to keep as much Heat as possible Inside – like a Greenhouse – as AIR TIGHT as possible so the plants don’t freeze. Make sure everything is well sealed so let as little air thru as possible.**

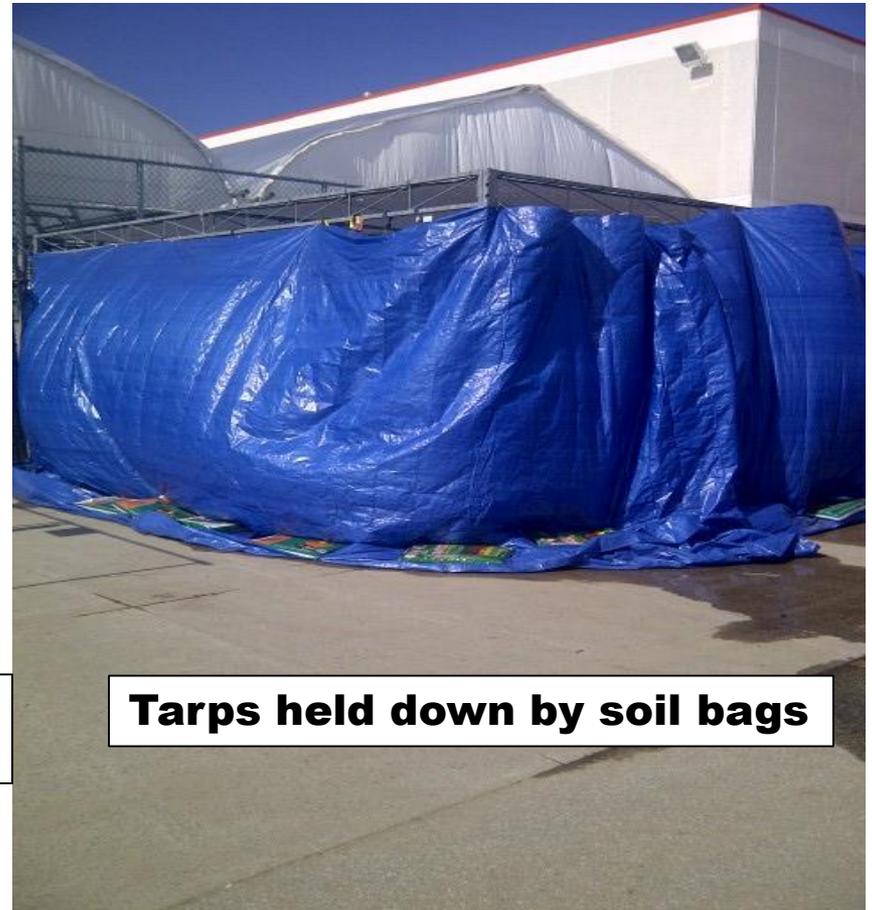

- **The tenting should be done closer to closing time – 7-9pm and not be removed until weather is about freezing temps in the morning – 8-9am**

FROST PROTECTION: Best Practice - Apron

- Hang Blue tarps off the sides of shade tent (use 40 x 50 Tarp)
- Secure with Zip Ties – as shown in photo
- All of these materials are sold in the stores.

Tarps rolled up after frost warning is passed

Tarps held down by soil bags

FROST PROTECTION: Best Practice

Tarps rolled up and secured by bungee cord

Tarps rolled up and secured by zip tie
